The office action mailed 7/27/04 does not reflect entry of the amendment filed 3/2/04 which is entered due the office action mailed 7/27/04 being non-final. Entry of the amendment necessitates a new grounds of rejection as stated below.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-8 and 10-25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no description in the disclosure as originally filed of implanting hydrogen ions into a semiconductor substrate "having implant-damaged stiffening material on the single crystal substrate".
